The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 30-34, 36-43 and 47-49 are rejected under 35 U.S.C. 102(b) as being anticipated by Mertz.

Mertz discloses preparation methods for coated magnesium hydroxide. These methods include the use of surface active agents listed at column 6, lines 46-68 and additional organic additives listed at column 5, line 56 to column 6, line 2. These surfactants and additives are seen as meeting the limitations of the instant claimed additives. The discussions at column 5, lines 4-27 and column 6, lines 3-12 is seen as teaching relative amounts of the additives meeting the limitations of the rejected claims. Particle sizes for the coated particles are taught as suitably 0.7 to 1 um (see claim 1).

Therefore the reference anticipates the rejected claims.

Claims 35, 44-46 and 50-52 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
